We are an engineering company that designs, develops and manufactures specialty vehicles for over 33 years. Mega specializes in the manufacturing of bullet and ballistic resistant vehicles for government officials, heads of state and business executives.

The vehicles are able to withstand both bullets and explosives, while the interior functions as a bunker. These armored vehicles boast ballistic proof body shields and it is nearly impossible to detect the armored model from a standard model. Mega Engineering Vehicles has made international headlines with their unmatched ability to transform armored vehicles into luxurious executive coaches. Standing out from the rest by displaying a rare combination of protection and elegance, Mega Armored Luxury Vehicles made everyone to rethink the limits in armored transportation.

If you already have an armored vehicle and are simply looking to have the interior customized, we have experience customizing vehicles up to B7 level armoring with stunning results.

If you are in the market for one, our experts are here to facilitate the purchase and creation of an exquisitely designed and secure vehicle that meets all your needs.

Mega Engineering Vehicles is world renowned as the leader in the industry of an original design manufacturer(ODM) of convertible vehicles.

MEGA maintains a highly trained staff of designers, engineers and craftsmen dedicated to provide the discerning enthusiast with state of the art automobile convertible designs.

Our engineering team has the depth and diversity of experience needed to deliver large programs as well as smaller based projects.

MEGA provides unmatched capability and experience in the build of Concept, Prototype, Exhibition Show and low-volume production programs on convertible vehicles.

Over the past 33 years we have acquired a deep understanding and capability in the integration and build of complete convertible vehicle roof systems. We have a rich history of providing design, engineering and build services to many OEM Authorized Dealers in the automotive.
